

FLAT2000L/R

Home Improvement Unit for Flats (models fitted with additional boost speed facility and heater)

Installation Guide

FLAT2000L/R

The FLAT2000 L/R is a 'handed' product.

The L/R signifies the discharge direction viewed from the front.

The FLAT2000 L unit is supplied arranged for LEFT HAND discharge of air.

The FLAT2000 R unit is supplied arranged for RIGHT HAND discharge of air.

Units are supplied assembled and include a thermostatically controlled heater. A unit mounted override switch is provided.

A 'BOOST' speed facility for additional ventilation is included. This is operated by a remote switch (supplied).

Electrical details

Supply: 230V 1 phase 50Hz

Power consumption (watts): Low speed = 8. Med = 14.

High = 22. Boost = 72.
